ABOUT US

I'm Sooraj A S, a **Web Developer and SEO Analyst** with **4+ years** of experience, having worked on **70+ projects** across different industries. I don't just build websites—I create platforms that are fast, user-focused, and built to rank on Google.

For me, it's not about design alone. It's about performance, visibility, and real business growth. I combine development with SEO strategies to make sure every website I build attracts the right audience and turns visitors into customers.
